

Dave D'Amore is a Research Soil Scientist with the Pacific Northwest Research Station's Juneau Forestry Sciences Laboratory. He has a master's degree in soil science from Oregon State University and is currently a PhD candidate in forest soils at the University of Alaska, Fairbanks. He has conducted forest ecosystem research in southeast Alaska since 1994 that has focused on silviculture and soil productivity, soil hydrology, and soil biogeochemistry. His current research is examining the influence of soil geomorphology on forest and wetland carbon cycling and storage in the coastal temperate rainforest.
